STKd 100% BITCOIN & 100% GOLD ETF– FUND SUMMARY

Investment Objective

The STKd 100% Bitcoin & 100% Gold ETF (the “Fund”) seeks long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses⁽¹⁾ (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.99%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses ⁽²⁾	0.00%
Acquired Fund Fees and Expenses ⁽²⁾⁽³⁾	0.06%
Total Annual Fund Operating Expenses	1.05%

⁽¹⁾ The Fund’s adviser, Tidal Investments LLC (the “Adviser”), a Tidal Financial Group company, will pay, or require a sub-adviser to pay, all expenses incurred by the Fund (except for advisory fees and sub-advisory fees, as the case may be) excluding interest charges on any borrowings made for investment purposes, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940, as amended (the “1940 Act”), and litigation expenses, and other non-routine or extraordinary expenses.

⁽²⁾ Based on estimated amounts for the current fiscal year.

⁽³⁾ Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies.

Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years
\$107	\$334

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the Example, affect the Fund’s performance. For the fiscal period October 15, 2024 (commencement of operation) to March 31, 2025, the Fund’s portfolio turnover rate was 107% of the average value of its portfolio.

Principal Investment Strategies

The Fund is an actively-managed exchange-traded fund (“ETF”) that seeks to achieve its investment objective by investing via U.S.-listed futures contracts as well as pooled investment vehicles, such as exchange-traded products (“ETPs”) (“Underlying Funds”), in two complementary asset classes, a modern digital asset class (bitcoin) (the “Bitcoin strategy”) and a traditional asset class (gold) (the “Gold strategy”). Although ETPs may be referred to as “ETFs” or “funds,” ETPs are not registered under the 1940 Act and therefore are not subject to 1940 Act protections.

Bitcoin and gold are often viewed as complementary asset classes due to their differing characteristics and benefits. Gold is a traditional store of value, recognized for its stability and use as a hedge against inflation and economic uncertainty. Bitcoin, as a digital asset, offers high growth potential and diversification benefits, especially in the context of technological innovation and financial decentralization. While gold provides security and risk mitigation, bitcoin adds potential for capital appreciation and exposure to digital asset markets, making them complementary in balancing risk and reward in a diversified portfolio.

Bitcoin is sometimes referred to as “digital gold” due to the belief that it may serve as a durable store of value, similar to gold. However, bitcoin has not yet fully achieved this status, and there remains a low correlation between the performance of bitcoin and gold. As a result, bitcoin may not currently exhibit the same stability or risk mitigation properties as gold in periods of market stress or inflationary environments.

The Fund uses leverage to “stack” the total return of holdings in the Fund’s Bitcoin strategy together with the total returns of holdings in the Fund’s Gold strategy. Essentially, one dollar invested in the Fund provides approximately one dollar of exposure to the Fund’s Bitcoin strategy and approximately one dollar of exposure to the Fund’s Gold strategy. So, the return of the Gold strategy (minus the cost of financing) is essentially stacked on top of the returns of the Bitcoin strategy (minus the cost of financing). Under normal circumstances, the Fund’s notional exposure to the Bitcoin strategy will represent approximately 100% of the Fund’s net assets, and the Fund’s notional exposure to Gold strategy will represent approximately 100% of the Fund’s net assets. The Underlying Funds may gain their exposure to the underlying asset classes either directly, or through the use of derivative instruments, such as futures contracts and swaps.

In particular, the term “exposure” refers to the degree to which the Fund’s investment is influenced by fluctuations in each of the Bitcoin strategy and the Gold strategy (as described more fully below). If you invest one dollar in the Fund, one dollar’s worth of that investment will track the performance of the Fund’s Bitcoin strategy (as described more fully below), behaving similarly to how bitcoin price performs. In addition, one’s dollar’s worth of that investment will track the performance of the Gold strategy, mirroring the ups and downs of the price of gold. Through the Fund’s use of leverage, each dollar invested is effectively doubled to follow and potentially profit (or experience losses) from two different investment strategies. The Fund’s investment strategy is based on the belief that the combination of investing in the Bitcoin strategy and the Gold strategy may provide complementary benefits, given their historically low correlation (their historical price movements have not been closely related). By blending assets with low correlation, the Fund aims to reduce the impact of short-term market fluctuations on the overall investment outcome, potentially providing a more stable investment trajectory.

The Fund will invest primarily in:

- Gold futures contracts
- Bitcoin futures contracts
- Underlying Funds providing exposure to gold
- Underlying Funds providing exposure to bitcoin
- Cash and cash equivalents
- Reverse repurchase agreements

Bitcoin Strategy

The Fund seeks to capture the price return of bitcoin. To do so, the Fund will invest in bitcoin futures contracts and Underlying Funds that provide exposure to bitcoin and/or U.S. listed bitcoin futures. With respect to the Underlying Funds, low-cost bitcoin ETPs that have ample liquidity will be favored. Under normal circumstances, the Fund’s notional exposure to the Bitcoin strategy will represent approximately 100% of the Fund’s net assets.

Gold Strategy

The Fund seeks to capture the price return of gold. To do so, the Fund will invest in gold futures contracts and Underlying Funds that provide exposure to gold, and/or U.S. listed gold futures. With respect to the Underlying Funds, low-cost gold ETPs that have ample liquidity will be favored. Under normal circumstances, the Fund’s notional exposure to the Gold strategy will represent approximately 100% of the Fund’s net assets.

Example: If the Fund has \$100 in assets, the Fund expects to achieve \$100 of exposure to the Bitcoin strategy and \$100 of exposure to the Gold strategy. This is akin to investing \$100 in a bitcoin strategy fund, borrowing \$100, and putting the borrowed \$100 in a gold strategy fund.

Note: Notional value is the total underlying amount of a derivatives trade. Leverage allows an investor (like the Fund) to use a small amount of money to gain exposure to a larger (and potentially, a much larger) amount. So, notional value reflects the total value of a trade, not the cost (or market value) of taking the trade. Via the Fund’s use of futures in both its Bitcoin strategy and Gold strategy (described below), the Fund provides leveraged exposure to a combination of bitcoin and gold.

Futures contracts have a limited lifespan before they expire (e.g., quarterly). The Fund will frequently “roll-over” futures contracts - replace an expiring contract with a contract that expires further in the future. As a result, the Fund’s portfolio will be subject to a high portfolio turnover rate.

The Fund does not invest directly in bitcoin or any other digital assets. The Fund does not invest in or seek direct exposure to the current “spot” or cash price of bitcoin. Investors seeking direct exposure to the price of bitcoin should consider an investment other than the Fund.

The Fund does not invest directly in gold or gold bullion. Investors seeking direct exposure to the price of gold should consider an investment other than the Fund.

Cayman Subsidiary:

The Fund intends to gain exposure to futures contracts and the Underlying Funds either directly or indirectly by investing through a wholly-owned Cayman Islands subsidiary (the “Subsidiary”) that is advised by the Adviser (as defined below) and the Sub-Adviser (as defined below). The Fund may invest up to 25% of its total assets in the Subsidiary, tested at the end of each fiscal quarter.

The Subsidiary will generally invest in futures contracts and Underlying Funds that do not generate “qualifying income” under the source of income test required to qualify as a regulated investment company (“RIC”) under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”). Unlike the Fund, the Subsidiary may invest without limitation in futures contracts; however, the Subsidiary will comply with the same Investment Company Act of 1940, as amended (the “1940 Act”), requirements that are applicable to the Fund’s transactions in derivatives. In addition, the Subsidiary will be subject to the same fundamental investment restrictions as the Fund and will comply with them on an aggregate basis with the Fund, and will follow the same compliance policies and procedures as the Fund. Unlike the Fund, the Subsidiary will not seek to qualify as a RIC under the Code. The Fund is the sole investor in the Subsidiary and does not expect the shares of the Subsidiary to be offered or sold to other investors. Because the value of the Subsidiary must not exceed 25% of the Fund’s value at the close of any quarter, the Subsidiary may need to sell assets as a quarter end approaches and pay a dividend to the Fund. This dividend will constitute qualifying income for RIC purposes. Except as otherwise noted, for purposes of this Prospectus, references to the Fund’s investments include the Fund’s indirect investments through the Subsidiary.

Reverse Repurchase Agreements

The Fund may invest in reverse repurchase agreements, which are a form of borrowing where the Fund sells portfolio securities to financial institutions and agrees to repurchase them at a later date for a higher price. This arrangement allows the Fund to use the proceeds from the initial sale for other investment purposes. However, since the Fund repurchases the securities at a higher price, it incurs a loss on these transactions.

To qualify for treatment as a regulated investment company (RIC) under the Internal Revenue Code, the Fund may use reverse repurchase agreements to ensure that its investment in the Subsidiary does not exceed 25% of the Fund’s total assets at the end of each fiscal quarter (the “Asset Diversification Test”). During other times of the year, the Fund’s investments in the Subsidiary may exceed 25% of its total assets.

Collateral

As part of the Fund’s strategy, the Fund holds collateral investments. The Fund expects to invest approximately 10% to 65% of its net assets in U.S. Treasury bills, money market funds, cash and cash equivalents (e.g., high quality commercial paper and similar instruments that are rated investment grade or, if unrated, of comparable quality, as the Sub-Adviser determines), that provide liquidity, serve as margin or collateralize the Fund’s or the Subsidiary’s investments in futures contracts. Over a quarter end the percentage will likely be more than 75%, due to asset diversification requirements which the Fund must meet in order to qualify as a RIC, but the Fund will likely reinvest some of its liquid assets in the Subsidiary after the end of a quarter.

Other Fund Attributes

Under normal circumstances, the Fund will invest at least 80% of its net assets, plus borrowings for investment purposes, in (a) gold futures, (b) bitcoin futures, (c) Underlying Funds providing exposure to gold, and (d) Underlying Funds providing exposure to bitcoin. For purposes of compliance with this investment policy, derivative contracts will be valued at their notional value.

The Adviser reallocates the Fund’s portfolio holdings at least monthly to seek to maintain a balanced notional exposure of approximately 100% to bitcoin and 100% to gold. However, between reallocation dates, the allocation between the two assets may drift substantially, potentially necessitating more frequent reallocations to maintain the target exposure.

The Fund does not intend to hold futures contracts through expiration, but instead will roll its “prompt” futures positions. Rolling occurs when the Fund closes out of a futures contract as it nears expiration and then replaces it with a contract that has a later expiration. A “prompt” futures contract refers to the Fund’s futures contracts that are closest to expiration (e.g., for delivery in the next calendar month).

The Fund is classified as a “non-diversified” investment company under the 1940 Act and, therefore, may invest a greater percentage of its assets in a particular issuer than a diversified fund.

Information About Bitcoin

As noted above, the Fund does not invest directly in bitcoin or any other digital assets. The Fund does not invest in or seek direct exposure to the current “spot” or cash price of bitcoin. Investors seeking direct exposure to the price of bitcoin should consider an investment other than the Fund. The following provides an overview of bitcoin, the Bitcoin Blockchain, the relationship between the two, as well as their use cases.

Bitcoin Description:

Bitcoin, the first and most well-known modern digital asset, operates on a decentralized network using blockchain technology to facilitate secure and anonymous transactions. Bitcoin represents a digital asset that functions as a medium of exchange utilizing cryptographic protocols to secure transactional processes, control the creation of additional units, and verify the transfer of assets. Its operation on a decentralized blockchain network ensures both transparency and immutability of records, without the need for a central authority. This innovative technology underpinning bitcoin allows for peer-to-peer transactions and provides a framework for digital scarcity, making bitcoin a unique investment commodity within the digital asset landscape. Although bitcoin is called a crypto or digital currency, it is not presently accepted widely as a means of payment.

Bitcoin Blockchain Description:

The Bitcoin Blockchain constitutes a decentralized, digital ledger technology that chronologically and publicly records all bitcoin transactions. This technology is characterized by its use of blocks, which are structurally linked in a chain through cryptographic hashes. Each block contains a list of transactions that, once verified and added to the blockchain through a consensus process known as proof of work, which may take an hour or more, becomes irreversible and tamper-evident. The integrity, transparency, and security of the transactional data are maintained autonomously within the bitcoin network, eliminating the necessity for central oversight and facilitating trust in a peer-to-peer system.

The Relationship between Bitcoin and Bitcoin Blockchain:

Bitcoin is a digital asset that operates on the Bitcoin Blockchain, a decentralized and cryptographic ledger system. The Bitcoin Blockchain underpins the entire bitcoin network, providing a secure and transparent mechanism for recording bitcoin transactions. Each bitcoin transaction is verified by network participants and permanently recorded on the Bitcoin Blockchain, ensuring the integrity and traceability of the digital asset. Thus, while bitcoin serves as a medium of exchange or store of value, the Bitcoin Blockchain acts as the immutable record-keeping system that facilitates and authenticates the circulation and ownership of bitcoin. This symbiotic relationship ensures that bitcoin operates in a trustless and decentralized manner, with the Bitcoin Blockchain maintaining bitcoin’s history and scarcity.

Bitcoin and Bitcoin Blockchain Use Cases:

Bitcoin and the Bitcoin Blockchain serve as innovative financial instruments within the digital economy, offering multiple use cases. However, their adoption has been limited. Key applications include:

1. **Decentralized Transactions:** Bitcoin facilitates peer-to-peer financial transactions globally without the need for intermediaries, reducing transaction costs and times. This feature makes it an attractive option for cross-border transfers and remittances. Bitcoin and the Bitcoin Blockchain were designed to be used as an alternative general purpose payment system and while bitcoin may be an attractive option for cross border transfers and remittances, it is presently not widely used as a means of payment.
2. **Store of Value:** Due to its limited supply and decentralized nature, bitcoin is perceived as a digital alternative to traditional stores of value like gold, potentially serving as a hedge against inflation and currency devaluation.
3. **Smart Contracts:** While primarily associated with other blockchain platforms, the Bitcoin Blockchain can execute smart contracts—self-executing contractual agreements with the terms directly written into code—thereby enabling automated and conditional transactions.
4. **Asset Tokenization:** The Bitcoin Blockchain provides a platform for tokenizing assets, converting rights to an asset into a digital token on the blockchain. This can include real estate, stocks, or other forms of assets, enhancing liquidity and market efficiency. At this time this functionality is limited. Unlike the scripting language of blockchain platforms like Ethereum, the scripting language of the Bitcoin Blockchain is not Turing complete, and thus more limited in terms of the types of smart contracts it can support.

5. **Digital Identity Verification:** Leveraging the security and immutability of the Bitcoin Blockchain, companies can develop digital identity verification systems, enhancing privacy and reducing identity theft. At this time this functionality is limited.

Principal Investment Risks

The principal risks of investing in the Fund are summarized below. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its investment objective. For more information about the risks of investing in the Fund, see the section in the Fund's Prospectus titled "Additional Information About the Fund Principal Risks of Investing in the Fund."

Each risk summarized below is considered a principal risk of investing in the Fund, regardless of the order in which it appears.

Bitcoin Investment Risks. The Fund's indirect investment in bitcoin, through futures contracts and Underlying Funds, exposes it to the unique risks of this emerging innovation. Bitcoin's price is highly volatile, and its market is influenced by the changing bitcoin network, fluctuating acceptance levels, and unpredictable usage trends. Not being a legal tender and operating outside central authority systems like banks, bitcoin faces potential government restrictions. For instance, some countries may limit or ban bitcoin transactions, negatively impacting its market value.

The risks associated with bitcoin include the possibility of fraud, theft, market manipulation, and security breaches in trading platforms. A small group of large bitcoin holders, known as "whales," can significantly influence bitcoin's price and may have the ability to manipulate the price. The largely unregulated nature of bitcoin and its trading venues heightens risks of fraudulent activities and market manipulation, which could affect bitcoin's price. For example, if a group of miners gains control over a majority of the bitcoin network, they could manipulate transactions to their advantage. Historical instances have seen bitcoin trading venues shut down due to fraud or security breaches, often leaving investors without recourse and facing significant losses.

Updates to bitcoin's software, proposed by developers, can lead to the creation of new digital assets, or "forks," if not broadly adopted. This can impact bitcoin's demand and the Fund's performance. The extreme volatility of bitcoin's market price can result in shareholder losses. Furthermore, the operation of bitcoin trading platforms may be disrupted or cease altogether due to various issues, further affecting bitcoin's price and the Fund's investments.

The value of bitcoin has historically been subject to significant speculation, making trading and investing in bitcoin reliant on market sentiment rather than traditional fundamental analysis.

Bitcoin's price can be influenced by events unrelated to its security or utility, including instability in other speculative areas of the crypto/blockchain space, potentially leading to substantial declines in its value.

Risks associated with crypto asset trading platforms include fragmentation, regulatory non-compliance, and the possibility of enforcement actions by regulatory authorities, which could impact the valuation of bitcoin-linked derivatives held by the Fund.

The security of the Bitcoin Blockchain may be compromised if a single miner or group controls more than 50% of the network's hashing power, where hashing power refers to the computational capacity used to validate and secure transactions on the blockchain.

Proposed changes to the bitcoin protocol may not be universally adopted, leading to the creation of competing blockchains (forks) with different assets and participants, exemplified by past forks like Bitcoin Cash and Bitcoin SV.

The Bitcoin Blockchain protocol may contain vulnerabilities that attackers could exploit to disrupt its operation, potentially compromising the security and reliability of the network.

Emerging alternative public blockchains, particularly those emphasizing privacy through technologies like zero-knowledge cryptography, pose risks and challenges to the dominance of the Bitcoin Blockchain as a payment system.

Common impediments to adopting the Bitcoin Blockchain as a payment network include slow transaction processing, variability in transaction fees, and the volatility of bitcoin's price, which may deter widespread adoption by businesses and consumers.

The development and use of "Layer II solutions" are critical for the scalability and functionality of the Bitcoin Blockchain, but they also introduce risks such as off-chain transaction execution, which could affect transparency and security. Layer II solutions are off-chain protocols that improve scalability and reduce transaction costs by processing transactions outside the main blockchain network.

Adoption and use of other blockchains supporting advanced applications like smart contracts present challenges to the dominance of the Bitcoin Blockchain, potentially impacting its long-term relevance and utility in the evolving landscape of blockchain technology.

The Fund's strategy may be harmed to the extent bitcoin is viewed less as a risk asset, and more as, like gold, a safe haven asset, resulting in the two assets having a much higher correlation and a less stable investment trajectory for the Fund.

- **Digital Assets Risk:** Digital assets like bitcoin, designed as mediums of exchange, are still an emerging asset class and are not presently widely used as such. They operate independently of any central authority or government backing and are subject to regulatory changes and extreme price volatility. The trading platforms for digital assets are relatively new, largely unregulated or possibly operating out of compliance with regulations, and thus more vulnerable to fraud and failures compared to traditional, regulated exchanges. Shutdowns of these platforms due to fraud, technical glitches, or security issues can significantly affect digital asset prices and market volatility.
- **Digital Asset Markets Risk:** The digital asset market, particularly bitcoin, has experienced considerable volatility, leading to market disruptions and erosion of confidence among market participants. This instability and the resultant negative publicity could adversely affect the Fund's reputation and trading prices. Ongoing market turbulence could significantly impact the value of the Fund's share.
- **Blockchain Technology Risk:** Blockchain technology, which underpins bitcoin and other digital assets, is relatively new, and many of its applications are untested. The adoption of blockchain and the development of competing platforms or technologies could affect its usage. Investments in companies or vehicles that utilize blockchain technology are subject to market volatility and may experience lower trading volumes compared to more established industries. Additionally, regulatory changes, internet disruptions, cybersecurity incidents, and intellectual property disputes could further affect the adoption and functionality of blockchain technology.

Gold Investment Risks. The Fund will not invest directly in gold but will gain exposure through gold futures contracts and Underlying Funds. These investments are subject to significant risk due to the inherent volatility and unpredictability of the commodities markets. The value of these investments is typically derived from the price movements of physical gold or related economic variables. Price fluctuations in gold linked instruments can be swift and substantial, often showing a low correlation with the returns of traditional equity and bond markets and may not align with trends in other asset classes.

Numerous factors can influence the price of gold and gold futures contracts, including overall market movements, interest rate changes, and variations in global supply and demand. Additionally, the volume of gold imports and exports, production factors such as weather conditions, and technological advances in gold processing and mining can significantly impact gold and gold futures prices. Increased hedging activities, economic conditions, regulatory developments, and political stability also play crucial roles. Furthermore, global supply and demand dynamics, political and economic events, inflation expectations, currency exchange rates, and investment activities of hedge funds and commodity funds can all affect gold prices. Sharp fluctuations in gold markets may result in potential losses. In addition, Gold markets have experienced extended periods of flat or declining prices. Investors should also be aware that while gold is often used to preserve wealth, there is no assurance that it will maintain its long-term value in terms of purchasing power.

Derivatives Risks. The Fund's derivative investments carry risks such as an imperfect match between the derivative's performance and its underlying assets or index, and the potential for loss of principal, which can exceed the initial investment. Additionally, there are risks related to the possible default of the transaction's counterparty and the illiquidity of derivatives, making them hard to sell or trade. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a bankruptcy or other reorganization proceeding. The derivatives used by the Fund may give rise to a form of leverage. Leverage magnifies the potential for gain and the risk of loss. Certain of the Fund's transactions in derivatives could also affect the amount, timing, and character of distributions to shareholders, which may result in the Fund realizing more short-term capital gain and ordinary income subject to tax at ordinary income tax rates than it would if it did not engage in such transactions, which may adversely impact the Fund's after-tax returns.

- *Futures Contracts.* Risks of futures contracts include: (i) an imperfect correlation between the value of the futures contract and the underlying asset; (ii) possible lack of a liquid secondary market; (iii) the inability to close a futures contract when desired; (iv) losses caused by unanticipated market movements, which may be unlimited; (v) an obligation for the Fund to make daily cash payments to maintain its required margin, particularly at times when the Fund may have insufficient cash; and (vi) unfavorable execution prices from rapid selling. Unlike equities, which typically entitle the holder to a continuing stake in a corporation, futures contracts normally specify a certain date for settlement in cash based on the reference asset. As the futures contracts approach expiration, they may be replaced by similar contracts that have a later expiration. This process is referred to as "rolling." If the market for these contracts is in "contango," meaning that the prices of futures contracts in the nearer months are lower than the price of contracts in the distant months, the sale of the near-term month contract would be at a lower price

than the longer-term contract, resulting in a cost to “roll” the futures contract. The actual realization of a potential roll cost will be dependent upon the difference in price of the near and distant contract.

Underlying Fund Risk. The Fund’s investment strategy, involving indirect exposure to bitcoin and gold through one or more Underlying Funds, is subject to the risks associated with bitcoin as well as gold. Shareholders in the Fund bear both their proportionate share of expenses in the Fund and, indirectly, the expenses of the Underlying Funds.

Underlying Bitcoin Fund Risks: Investing in an Underlying Fund that focuses on bitcoin, either through direct holdings or indirectly via derivatives like futures contracts and swaps, carries significant risks. These risks include high market volatility, which can be influenced by technological advancements, regulatory changes, and broader economic factors. When trading derivatives, liquidity risks and counterparty risks are substantial. Managing futures contracts can be complex and may affect the performance of an Underlying Fund. The use of swap transactions is a highly specialized activity, which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. Additionally, each Underlying Fund, and consequently the Fund, is dependent on blockchain technology, which brings technological and cybersecurity risks, along with custodial challenges for securely storing digital assets. The constantly evolving regulatory and legal landscape presents continuous compliance and valuation difficulties. Risks related to market concentration and network issues in the digital asset sector further add complexity. Moreover, operational intricacies in managing digital assets and potential market volatility can lead to losses for each Underlying Fund.

Underlying Gold Fund Risks: Investing in an Underlying Fund that focuses on gold, either through direct holdings or indirectly via derivatives like futures contracts, carries significant risk due to the inherent volatility and unpredictability of the commodities markets. Underlying Funds that trade futures contracts are subject to derivatives risk, leverage risk, counterparty risk and futures contracts risk, among other risks. In addition, Underlying Funds holding gold directly face significant custodial and safeguarding risks regarding their gold holdings. There is an inherent danger of these gold bars being lost, damaged, stolen, or becoming inaccessible due to factors such as natural disasters or terrorism.

Potentially No 1940 Act Protections. It is expected that one or more Underlying Funds will not be registered as an investment company subject to the 1940 Act. In addition, Underlying Funds that invest directly in bitcoin or gold are not subject to the 1940 Act. Accordingly, investors in such an Underlying Fund would not have the protections expressly provided by that statute, including: provisions preventing Underlying Fund insiders from managing an Underlying Fund to their benefit and to the detriment of shareholders; provisions preventing an Underlying Fund from issuing securities having inequitable or discriminatory provisions; provisions preventing management by irresponsible persons; provisions preventing the use of unsound or misleading methods of computing Underlying Fund earnings and asset value; provisions prohibiting suspension of redemptions (except under limited circumstances); provisions limiting fund leverage; provisions imposing a fiduciary duty on fund managers with respect to receipt of compensation for services; and provisions preventing changes in an Underlying Fund’s character without the consent of shareholders. Although the Fund invests in one or more Underlying Funds only indirectly, the Fund’s investments are expected to be subject to loss as a result of these risks.

Cayman Subsidiary Risk. By investing in the Subsidiary, the Fund is indirectly exposed to the risks associated with the Subsidiary’s investments. The futures contracts and other investments held by the Subsidiary are subject to the same economic risks that apply to similar investments if held directly by the Fund. The Subsidiary is not registered under the 1940 Act, and, unless otherwise noted in this Prospectus, is not subject to all the investor protections of the 1940 Act. Changes in the laws of the United States and the Cayman Islands could result in the inability of the Fund and/or the Subsidiary to continue to operate as it does currently and could adversely affect the Fund. For example, the Cayman Islands does not currently impose any income, corporate or capital gains tax or withholding tax on the Subsidiary. If Cayman Islands law changes such that the Subsidiary must pay Cayman Islands taxes, Fund shareholders would likely suffer decreased investment returns. In addition, the Subsidiary is also subject to many of the risks to which the Fund is subject, such as tax risks, commodity related risks, and market and data risks.

Commodity-Linked Derivatives Tax Risk. The tax treatment of commodity-linked derivative instruments may be adversely affected by changes in legislation, regulations, or other legally binding authority. As a RIC, the Fund must derive at least 90% of its gross income each taxable year from certain qualifying sources of income under the Code. If, as a result of any adverse future legislation, U.S. Treasury regulations, and/or guidance issued by the Internal Revenue Service (the “IRS”), the income of the Fund from certain commodity-linked derivatives, including income from the Fund’s investments in the Subsidiary, were treated as non-qualifying income, the Fund may fail to qualify as RIC and/or be subject to federal income tax at the Fund level. The uncertainty surrounding the treatment of certain derivative instruments under the qualification tests for a RIC may limit the Fund’s use of such derivative instruments.

The Fund intends to limit its investment in the Subsidiary to no more than 25% of the value of its total assets in order to satisfy certain asset diversification requirements for taxation as a regulated investment company. The Fund intends to manage the exposure to the Subsidiary so that the Fund’s investments in the Subsidiary do not exceed 25% of the total assets at the end of any quarter. If the Fund’s investments in the Subsidiary were to exceed 25% of the Fund’s total assets at the end of a tax quarter, the Fund, generally, has a grace period to cure such lack of compliance. If the Fund fails to timely cure, it may no longer be eligible to be treated as a RIC.

Commodity Pool Regulatory Risk. The Fund's investment exposure to futures instruments will cause it to be deemed to be a commodity pool, thereby subjecting the Fund to regulation under the CEA and CFTC rules. The Adviser is registered as a commodity pool operator ("CPO") and the Fund will be operated in accordance with applicable CFTC rules, as well as the regulatory scheme applicable to registered investment companies. Registration as a CPO imposes additional compliance obligations on the Adviser and Futures Trading Advisor, as applicable, and the Fund related to additional laws, regulations, and enforcement policies, which could increase compliance costs and may affect the operations and financial performance of the Fund. However, the Fund's status as a commodity pool and the Adviser's registration as a CPO (are not expected to materially adversely affect the Fund's ability to achieve its investment objective. The CFTC has not passed on the adequacy of this Prospectus.

Tax Risk. The Fund intends to treat any income received by the Subsidiary from futures contracts or from Underlying Funds as "qualifying income" under the provisions of the Code applicable to RICs. The IRS has issued numerous private letter rulings ("PLRs") provided to third parties not associated with the Fund or its affiliates (which only those parties may rely on as precedent) concluding that similar arrangements resulted in qualifying income. Many of such PLRs have now been revoked by the IRS. In March of 2019, the IRS published Regulations that concluded that income from a corporation similar to the Subsidiary would be qualifying income. Although the Regulations do not require distributions from the Subsidiary, the Fund intends to cause the Subsidiary to make distributions that would allow the Fund to make timely distributions to its shareholders and to meet the requirement that the Subsidiary have a value not in excess of 25% of the Fund's value at the close of a quarter. The Fund generally will be required to include in its own taxable income the income of the Subsidiary for a tax year, regardless of whether the Fund receives a distribution of the Subsidiary's income in that tax year, and this income would nevertheless be subject to the distribution requirement for qualification as a regulated investment company and would be taken into account for purposes of the 4% excise tax.

If the Fund did not qualify as a RIC for any taxable year and certain relief provisions were not available, the Fund's taxable income would be subject to tax at the Fund level and to a further tax at the shareholder level when such income is distributed. In such event, in order to re-qualify for taxation as a RIC, the Fund might be required to recognize unrealized gains, pay substantial taxes and interest and make certain distributions. This would cause investors to incur higher tax liabilities than they otherwise would have incurred and would have a negative impact on Fund returns. In such event, the Fund's Board of Trustees may determine to reorganize or close the Fund or materially change the Fund's investment objective and strategies. In the event that the Fund fails to qualify as a RIC, the Fund will promptly notify shareholders of the implications of that failure.

Leverage Risk: As part of the Fund's principal investment strategy, the Fund will make investments in futures contracts. These derivative instruments provide the economic effect of financial leverage by creating additional investment exposure to the underlying instrument, as well as the potential for greater loss. **If the Fund uses leverage through purchasing derivative instruments, the Fund has the risk that losses may exceed the net assets of the Fund.** The net asset value of the Fund while employing leverage will be more volatile and sensitive to market movements.

Counterparty Risk. Counterparty risk is the likelihood or probability that a party involved in a transaction might default on its contractual obligation. Where the Fund enters into derivative contracts that are exchange-traded, the Fund is subject to the counterparty risk associated with the Fund's clearing broker or clearinghouse. Relying on a counterparty exposes the Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Fund to suffer a loss. If a counterparty defaults on its payment obligations to the Fund, this default will cause the value of an investment in the Fund to decrease. In addition, to the extent the Fund deals with a limited number of counterparties, it will be more susceptible to the credit risks associated with those counterparties.

Concentration Risk. The Fund will not concentrate its investments (i.e., hold more than 25% of its total assets) in any industry or group of related industries, except that the Fund will have economic exposure that is concentrated to the industries, if any, assigned to bitcoin and gold. As a result, the Fund may be more susceptible to loss due to adverse occurrences that affect the price of such industries more than the market as a whole.

Reverse Repurchase Agreement Risk. Similar to borrowing, reverse repurchase agreements provide the Fund with cash for investment purposes, which creates leverage and subjects the Fund to the risks of leverage. Reverse repurchase agreements also involve the risk that the other party may fail to return the securities in a timely manner or at all. The Fund could lose money if it is unable to recover the securities and/or if the value of collateral held by the Fund, including the value of the investments made with cash collateral, is less than the value of securities.

ETF Risks.

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as Authorized Participants or APs). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders

and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

- *Cash Redemption Risk.* The Fund's investment strategy is expected to require it to redeem its shares for cash or to otherwise include primarily cash as part of its redemption proceeds. As a result, the Fund may be required to sell or unwind portfolio investments to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to incur brokerage costs and/or recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used. By paying out higher annual capital gain distributions, investors may be subjected to increased capital gains taxes. Brokerage costs could be imposed on the Fund, and thus decrease the Fund's net asset value, to the extent that the costs are not offset by a transaction fee payable by an AP.
- *Costs of Buying or Selling Shares.* Buying or selling Shares involves certain costs, including brokerage commissions, other charges imposed by brokers, and bid-ask spreads. The bid-ask spread represents the difference between the price at which an investor is willing to buy Shares and the price at which an investor is willing to sell Shares. The spread varies over time based on the Shares' trading volume and market liquidity. The spread is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Due to the costs of buying or selling Shares, frequent trading of Shares may reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. Because securities held by the Fund may trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of ETFs holding only domestic securities.
- *Trading.* Although Shares are listed for trading on a national securities exchange, such as The Nasdaq Stock Market, LLC (the "Exchange"), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's portfolio holdings, which can be significantly less liquid than Shares.

Economic and Market Risk. Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in the general financial markets, a particular financial market, or other asset classes, due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, financial system instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. The imposition by the U.S. of tariffs on goods imported from foreign countries and reciprocal tariffs levied on U.S. goods by those countries also may lead to volatility and instability in domestic and foreign markets.

High Portfolio Turnover Risk. A high portfolio turnover rate increases transaction costs, which may increase the Fund's expenses and reduce performance. Frequent trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Adviser or Sub-Adviser's success or failure to implement investment strategies for the Fund.

Money Market Instrument Risk. The Fund may use a variety of money market instruments for cash management purposes, including money market funds, depositary accounts and repurchase agreements. Repurchase agreements are contracts in which a seller of securities agrees to buy the securities back at a specified time and price. Repurchase agreements may be subject to market and credit risk related to the collateral securing the repurchase agreement. Money market instruments, including money market funds, may lose money through fees or other means.

Newer Fund Risk. The Fund is a recently organized management investment company with a limited operating history. As a result, prospective investors have only a limited track record or history on which to base their investment decisions. There can be no assurance that the Fund will grow to or maintain an economically viable size.

Newer Sub-Adviser Risk. The Sub-Adviser is a recently formed entity and has limited experience with managing an ETF, which may limit the Sub-Adviser's effectiveness. As a result, there is no long-term track record against which an investor may judge the Sub-Adviser and it is possible the Sub-Adviser may not achieve the Fund's intended investment objective.

Non-Diversification Risk. Because the Fund is non-diversified, it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a single issuer or a smaller number of issuers could cause the Fund's overall value to decline to a greater degree than if the Fund held a more diversified portfolio.

Operational Risk. The Fund is subject to risks arising from various operational factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund relies on third-parties for a range of services, including custody. Any delay or failure relating to engaging or maintaining such service providers may affect the Fund's ability to meet its investment objective. Although the Fund, Adviser, and Sub-Adviser seek to reduce these operational risks through controls and procedures, there is no way to completely protect against such risks.

U.S. Government and U.S. Agency Obligations Risk. The Fund may invest in securities issued by the U.S. government or its agencies or instrumentalities. U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities, such as the U.S. Treasury. Payment of principal and interest on U.S. Government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S. Government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so.

Performance

Performance information for the Fund is not included because the Fund has not completed a full calendar year of operations as of the date of this Prospectus. When such information is included, this section will provide some indication of the risks of investing in the Fund by showing changes in the Fund's performance history from year to year and showing how the Fund's average annual total returns compare with those of a broad measure of market performance. Although past performance of the Fund is no guarantee of how it will perform in the future, historical performance may give you some indication of the risks of investing in the Fund. Updated performance information will be available on the Fund's website at www.quantifyfunds.com.

Management

Investment Adviser

Tidal Investments LLC ("Tidal" or the "Adviser") serves as investment adviser to the Fund and the Subsidiary.

Investment Sub-Adviser

Quantify Chaos Advisors, LLC (the "Sub-Adviser") serves as investment sub-adviser to the Fund and the Subsidiary.

Portfolio Managers

The following individuals are jointly and primarily responsible for the day-to-day management of the Fund and the Subsidiary.

David Dziekanski, Portfolio Manager for the Sub-Adviser, has been a portfolio manager of the Fund and the Subsidiary since their inception in 2024.

Michael Venuto, Portfolio Manager for the Adviser, has been a portfolio manager of the Fund and the Subsidiary since their inception in 2024.

Christopher P. Mullen, Portfolio Manager for the Adviser, has been a portfolio manager of the Fund and the Subsidiary since their inception in 2024.

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the Deposit Securities) and/or a designated amount of U.S. cash.

Shares are listed on the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the “bid” price) and the lowest price a seller is willing to accept for Shares (the “ask” price) when buying or selling Shares in the secondary market. This difference in bid and ask prices is often referred to as the bid-ask spread.

Information regarding the Fund’s NAV, market price, how often Shares traded on the Exchange at a premium or discount, and the median bid-ask spread can be found on the Fund’s website at www.quantifyfunds.com

Tax Information

Fund distributions are generally taxable to shareholders as ordinary income or capital gains (or some combination thereof), unless your investment is in an individual retirement account (“IRA”) or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training, or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements will not result in increased Fund expenses, ask your salesperson or visit the Intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

Investment Objective

The Fund’s investment objective is to seek long-term capital appreciation.

The Fund’s investment objective may be changed without the consent of the Fund’s shareholders upon approval by the Board of Trustees (the Board) of Tidal Trust II (the “Trust”) and at least 60 days’ written notice to shareholders. Similarly, the Fund’s “80%” policy may be changed without shareholder approval. However, Fund shareholders would be given at least 60 days’ notice prior to any such change.

Principal Investment Strategies

Under normal circumstances, the Fund will invest at least 80% of its net assets, plus borrowings for investment purposes, in (a) gold futures and (b) bitcoin futures, (c) Underlying Funds providing exposure to gold, and (d) Underlying Funds providing exposure to bitcoin.

The Fund’s “80%” policy is non-fundamental and can be changed without shareholder approval. However, Fund shareholders would be given at least 60 days’ notice prior to any such change.

Futures Rolling:

As described in the Fund’s principal investment strategies in the section titled “Fund Summary — Principal Investment Strategies” above, the Fund does not intend to hold futures contracts through expiration, but instead will roll its “prompt” futures positions. Rolling occurs when the Fund closes out of a futures contract as it nears expiration and then replaces it with a contract that has a later expiration. A “prompt” futures contract refers to the Fund’s futures contracts that are closest to expiration (e.g., for delivery in the next calendar month).

When futures contracts with a longer term to expiration are priced higher than futures contracts with a shorter term to expiration, it is called “contango.” Conversely, when futures contracts with a longer term to expiration are priced lower than futures contracts with a shorter term to expiration it is called “backwardation.” Contango and backwardation will have different impacts on the Fund. When rolling futures contracts that are in contango, the Fund may sell the expiring futures contract at a lower price than the higher priced longer-dated futures contract, resulting in a negative roll yield (i.e., a potential loss). When rolling futures contracts that are in

backwardation, the Fund may sell the expiring futures contract at a higher price than the lower priced longer-dated futures contract, resulting in a positive roll yield (i.e., a potential gain).

A negative roll yield occurs when the price of the futures is lower than expected when the prompt futures contract expires. This situation will result in a loss for investors (like the Fund) who roll over their prompt months' futures contracts into a contract in the future. Negative roll yield will have a negative impact on investors (like the Fund) who are long prompt month futures contracts and must roll the contract prior to the prompt month futures expiration.

Margin

The Fund will invest in futures contracts, as described in the Fund's principal investment strategies in the section titled "Fund Summary — Principal Investment Strategies" above. An investor in futures contracts generally deposits cash (also known as "margin") with a futures commission merchant (an "FCM") for its open positions in futures contracts. The margin requirements or position limits may be based on the notional exposure of the futures contracts, or the number of futures contracts purchased. The FCM, in turn, generally transfers such deposits to the clearing house to protect the clearing house against non-payment by the Fund. The Fund may also be required to pay variation margin, which is the amount of cash that each party agrees to pay to or receive from the other to reflect the daily fluctuation in the value of the futures contract. The clearing house effectively serves as the counterparty to a futures contract. In addition, the FCM may require the Fund to deposit additional margin collateral in excess of the clearing house's requirements for the FCM's own protection.

A Treasury bill is a short-term U.S. government debt obligation backed by the Treasury Department with a maturity of one year or less. A Treasury note is a U.S. government debt security with a fixed interest rate and a maturity between two and 10 years. Treasury bonds are U.S. government securities that have a 20-year or 30-year term, and they pay a fixed interest rate on a semi-annual basis.

Additional Information Related to the Cayman Subsidiary

The Subsidiary is not registered under the 1940 Act, and, unless otherwise noted in this Prospectus, is not subject to all the investor protections of the 1940 Act. However, the Fund wholly owns and controls its Subsidiary, making it unlikely that the Subsidiary will take action contrary to the interests of the Fund and its shareholders. The Board has oversight responsibility for the investment activities of the Fund, including its investment in its Subsidiary, and the Fund's role as sole shareholder of its Subsidiary.

The principal investment strategies and risks of the Subsidiary are also principal investment strategies and risks of the Fund and that therefore the principal investment strategies and principal risk disclosures of the registration statement reflect the operations of the Fund and its subsidiaries, including the Subsidiary, on a consolidated basis.

The investment adviser and sub-adviser to the Subsidiary each comply with provisions of the 1940 Act relating to investment advisory contracts (Section 15) as if each were an investment adviser to the Fund under Section 2(a)(20) of the 1940 Act; provided, however, that for purposes of complying with Section 15(c), the reviews of the Fund's and its Subsidiary's investment advisory agreements may be combined.

The Subsidiary complies with the 1940 Act provisions relating to affiliated transactions and custody (Section 17). The Subsidiary's custodian is U.S. Bank. The Fund complies with the provisions of the 1940 Act governing capital structure and leverage (Section 18) on an aggregate basis with the Subsidiary so that the Fund treats the Subsidiary's debt as its own for purposes of Section 18. The Fund does not intend to create or acquire primary control of any entity which engages in investment activities in securities or other assets, other than entities it wholly-owns.

The financial statements of the Subsidiary will be consolidated with the Fund's financial statements in the Fund's annual and semi-annual reports.

Reverse Repurchase Agreements

As noted above, the Fund may use reverse repurchase agreements, a form of borrowing where it sells securities and agrees to buy them back later at a higher price, allowing it to use the sale proceeds for other investments. This practice results in a loss for the Fund as it repurchases the securities at a higher price. To qualify as a regulated investment company (RIC) under the Internal Revenue Code, the Fund ensures its investment in the Subsidiary does not exceed 25% of its total assets at the end of each fiscal quarter. During other times of the year, this investment may exceed 25%.

To manage its asset exposure to the Subsidiary, the Fund may use short-term Treasury Bills it owns (and purchase additional Treasury Bills if necessary) to engage in reverse repurchase agreements, which function as loans to the Fund. These loans increase the Fund's gross assets, helping it meet the Asset Diversification Test. When entering a reverse repurchase agreement, the Fund will either (i) comply with Section 18 of the Investment Company Act of 1940 by maintaining asset coverage of at least 300% of the value of the reverse repurchase agreement; or (ii) treat the reverse repurchase agreement transactions as derivative transactions under Rule 18f-4 of the 1940 Act, adhering to the applicable value-at-risk based limit on leverage risk.

Temporary Defensive Strategies

For temporary defensive purposes during adverse market, economic, political, or other conditions, the Fund may invest in a manner that is inconsistent with its principal investment strategies, including investments in cash or cash equivalents or short-term instruments such as commercial paper, money market mutual funds, or short-term U.S. government securities. Taking a temporary defensive position may result in the Fund not achieving its investment objective.

Manager of Managers Structure

The Fund and the Adviser have received exemptive relief from the SEC permitting the Adviser (subject to certain conditions and the approval of the Board) to change or select new unaffiliated sub-advisers without obtaining shareholder approval. The relief also permits the Adviser to materially amend the terms of agreements with an unaffiliated sub-adviser (including an increase in the fee paid by the Adviser to the unaffiliated sub-adviser (and not paid by the Fund)) or to continue the employment of an unaffiliated sub-adviser after an event that would otherwise cause the automatic termination of services with Board approval, but without shareholder approval. Shareholders will be notified of any unaffiliated sub-adviser changes. The Adviser has the ultimate responsibility, subject to oversight by the Board, to oversee a sub-adviser and recommend their hiring, termination and replacement. The exemptive relief applies to sub-advisers that are either wholly owned by the Adviser or its parent company, as well as to unaffiliated sub-advisers, including those whose affiliation arises solely from their sub-advisory relationship.

Principal Risks of Investing in the Fund

The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s NAV per share, trading price, yield, total return and/or ability to meet its investment objective. The following risks could affect the value of your performance in the Fund:

Bitcoin Investment Risks. The Fund’s indirect investment in bitcoin, through futures contracts and Underlying Funds, exposes it to the unique risks of this emerging innovation. Bitcoin’s price is highly volatile, and its market is influenced by the changing bitcoin network, fluctuating acceptance levels, and unpredictable usage trends. Not being a legal tender and operating outside central authority systems like banks, bitcoin faces potential government restrictions. For instance, some countries may limit or ban bitcoin transactions, negatively impacting its market value.

The risks associated with bitcoin include the possibility of fraud, theft, market manipulation, and security breaches in trading platforms. A small group of large bitcoin holders, known as “whales,” can significantly influence bitcoin’s price and may have the ability to manipulate the price. The largely unregulated nature of bitcoin and its trading venues heightens risks of fraudulent activities and market manipulation, which could affect bitcoin’s price. For example, if a group of miners gains control over a majority of the bitcoin network, they could manipulate transactions to their advantage. Historical instances have seen bitcoin trading venues shut down due to fraud or security breaches, often leaving investors without recourse and facing significant losses.

Updates to bitcoin’s software, proposed by developers, can lead to the creation of new digital assets, or “forks,” if not broadly adopted. This can impact bitcoin’s demand and the Fund’s performance. The extreme volatility of bitcoin’s market price can result in shareholder losses. Furthermore, the operation of bitcoin trading platforms may be disrupted or cease altogether due to various issues, further affecting bitcoin’s price and the Fund’s investments.

The value of bitcoin has historically been subject to significant speculation, making trading and investing in bitcoin reliant on market sentiment rather than traditional fundamental analysis.

Bitcoin’s price can be influenced by events unrelated to its security or utility, including instability in other speculative areas of the crypto/blockchain space, potentially leading to substantial declines in its value.

Risks associated with crypto asset trading platforms include fragmentation, regulatory non-compliance, and the possibility of enforcement actions by regulatory authorities, which could impact the valuation of bitcoin-linked derivatives held by the Fund.

The security of the Bitcoin Blockchain may be compromised if a single miner or group controls more than 50% of the network’s hashing power, where hashing power refers to the computational capacity used to validate and secure transactions on the blockchain.

Proposed changes to the bitcoin protocol may not be universally adopted, leading to the creation of competing blockchains (forks) with different assets and participants, exemplified by past forks like Bitcoin Cash and Bitcoin SV.

The Bitcoin Blockchain protocol may contain vulnerabilities that attackers could exploit to disrupt its operation, potentially compromising the security and reliability of the network.

Emerging alternative public blockchains, particularly those emphasizing privacy through technologies like zero-knowledge cryptography, pose risks and challenges to the dominance of the Bitcoin Blockchain as a payment system.

Common impediments to adopting the Bitcoin Blockchain as a payment network include slow transaction processing, variability in transaction fees, and the volatility of bitcoin's price, which may deter widespread adoption by businesses and consumers.

The development and use of "Layer II solutions" are critical for the scalability and functionality of the Bitcoin Blockchain, but they also introduce risks such as off-chain transaction execution, which could affect transparency and security. Layer II solutions are off-chain protocols that improve scalability and reduce transaction costs by processing transactions outside the main blockchain network.

Adoption and use of other blockchains supporting advanced applications like smart contracts present challenges to the dominance of the Bitcoin Blockchain, potentially impacting its long-term relevance and utility in the evolving landscape of blockchain technology.

The Fund's strategy may be harmed to the extent bitcoin is viewed less as a risk asset, and more as, like gold, a safe haven asset, resulting in the two assets having a much higher correlation and a less stable investment trajectory for the Fund.

- **Digital Assets Risk:** Digital assets like bitcoin, designed as mediums of exchange, are still an emerging asset class and are not presently widely used as such. They operate independently of any central authority or government backing and are subject to regulatory changes and extreme price volatility. The trading platforms for digital assets are relatively new, largely unregulated or possibly operating out of compliance with regulations, and thus more vulnerable to fraud and failures compared to traditional, regulated exchanges. Shutdowns of these platforms due to fraud, technical glitches, or security issues can significantly affect digital asset prices and market volatility.
- **Digital Asset Markets Risk:** The digital asset market, particularly bitcoin, has experienced considerable volatility, leading to market disruptions and erosion of confidence among market participants. This instability and the resultant negative publicity could adversely affect the Fund's reputation and trading prices. Ongoing market turbulence could significantly impact the value of the Fund's share.
- **Blockchain Technology Risk:** Blockchain technology, which underpins bitcoin and other digital assets, is relatively new, and many of its applications are untested. The adoption of blockchain and the development of competing platforms or technologies could affect its usage. Investments in companies or vehicles that utilize blockchain technology are subject to market volatility and may experience lower trading volumes compared to more established industries. Additionally, regulatory changes, internet disruptions, cybersecurity incidents, and intellectual property disputes could further affect the adoption and functionality of blockchain technology.

Cayman Subsidiary Risk. By investing in the Subsidiary, the Fund is indirectly exposed to the risks associated with the Subsidiary's investments. The futures contracts and other investments held by the Subsidiary are subject to the same economic risks that apply to similar investments if held directly by the Fund. There can be no assurance that the investment objectives of the Subsidiary will be achieved. The Subsidiary is not registered under the 1940 Act, and, unless otherwise noted in this Prospectus, is not subject to all the investor protections of the 1940 Act. Changes in the laws of the United States and the Cayman Islands could result in the inability of the Fund and/or the Subsidiary to continue to operate as it does currently and could adversely affect the Fund. For example, the Cayman Islands does not currently impose any income, corporate or capital gains tax or withholding tax on the Subsidiary. If Cayman Islands law changes such that the Subsidiary must pay Cayman Islands taxes, Fund shareholders would likely suffer decreased investment returns.

Commodity-Linked Derivatives Tax Risk. The tax treatment of the Fund's use of commodity-linked derivative instruments may be adversely affected by changes in legislation, regulations or other legally binding authority. The Fund may incur transaction and other costs to comply with any new or additional guidance from the IRS. The Fund intends to limit its investment in the Subsidiary to no more than 25% of the value of its total assets in order to satisfy certain asset diversification requirements for taxation as a regulated investment company. The investment strategy of the Fund may cause the Fund to hold more than 25% of the Fund's total assets in investments in its Subsidiary the majority of the time. The Fund intends to manage the exposure to its Subsidiary so that the Fund's investments in the Subsidiary do not exceed 25% of the total assets at the end of any quarter. If the Fund's investments in its Subsidiary were to exceed 25% of the Fund's total assets at the end of a tax quarter, the Fund, generally, has a grace period to cure such lack of compliance. If the Fund fails to timely cure, it may no longer be eligible to be treated as a RIC.

Commodity Pool Regulatory Risk. The Fund's investment exposure to futures instruments will cause it to be deemed to be a commodity pool, thereby subjecting the Fund to regulation under the Commodity Exchange Act ("CEA") and CFTC rules. The Adviser is registered as a CPO and the Fund will be operated in accordance with applicable CFTC rules, as well as the regulatory scheme applicable to registered investment companies. Registration as a CPO or CTA imposes additional compliance obligations on the Adviser

and the Fund related to additional laws, regulations, and enforcement policies, which could increase compliance costs and may affect the operations and financial performance of the Fund. However, the Fund's status as a commodity pool and the Adviser's registration as a CPO or CTA, respectively, are not expected to materially adversely affect the Fund's ability to achieve its investment objective. The CFTC has not passed on the adequacy of this Prospectus.

Concentration Risk. The Fund will not concentrate its investments (i.e., hold more than 25% of its total assets) in any industry or group of related industries, except that the Fund will have economic exposure that is concentrated to the industries, if any, assigned to bitcoin and gold. As a result, the Fund may be more susceptible to loss due to adverse occurrences that affect the price of such industries more than the market as a whole.

Counterparty Risk. Counterparty risk is the likelihood or probability that a party involved in a transaction might default on its contractual obligation. Where the Fund enters into derivative contracts that are exchange-traded, the Fund is subject to the counterparty risk associated with the Fund's clearing broker or clearinghouse. Relying on a counterparty exposes the Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Fund to suffer a loss. If a counterparty defaults on its payment obligations to the Fund, this default will cause the value of an investment in the Fund to decrease. In addition, to the extent the Fund deals with a limited number of counterparties, it will be more susceptible to the credit risks associated with those counterparties.

Derivatives Risks. The Fund's derivative investments carry risks such as an imperfect match between the derivative's performance and its underlying assets or index, and the potential for loss of principal, which can exceed the initial investment. Additionally, there are risks related to the possible default of the transaction's counterparty and the illiquidity of derivatives, making them hard to sell or trade. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in a bankruptcy or other reorganization proceeding. The derivatives used by the Fund may give rise to a form of leverage. Leverage magnifies the potential for gain and the risk of loss. Certain of the Fund's transactions in derivatives could also affect the amount, timing, and character of distributions to shareholders, which may result in the Fund realizing more short-term capital gain and ordinary income subject to tax at ordinary income tax rates than it would if it did not engage in such transactions, which may adversely impact the Fund's after-tax returns.

- *Futures Contracts.* Risks of futures contracts include: (i) an imperfect correlation between the value of the futures contract and the underlying asset; (ii) possible lack of a liquid secondary market; (iii) the inability to close a futures contract when desired; (iv) losses caused by unanticipated market movements, which may be unlimited; (v) an obligation for the Fund to make daily cash payments to maintain its required margin, particularly at times when the Fund may have insufficient cash; and (vi) unfavorable execution prices from rapid selling.

The Fund is subject to risks related to "rolling" futures contracts. Rolling occurs when the Fund closes out of a futures contract as it nears its expiration and replaces it with a contract that has a later expiration. The Fund does not intend to hold futures contracts through expiration, but instead intends to "roll" its futures positions. The Fund will incur exchange and brokerage costs to effect the rolling of futures contracts. When the market for these futures contracts is such that the prices are higher in the more distant delivery months than in the nearer delivery months, the sale during the course of the rolling process of the more nearby contract would take place at a price that is lower than the price of the more distant contract. This pattern of higher futures contract prices for longer expiration contracts is often referred to as "contango." Alternatively, when the market for futures contracts is such that the prices are higher in the nearer months than in the more distant months, the sale during the course of the rolling process of the more nearby contract would take place at a price that is higher than the price of the more distant contract. This pattern of higher futures prices for shorter expiration futures contracts is referred to as "backwardation." Extended periods of contango could possibly cause significant losses for the Fund. The Adviser will utilize active management techniques to seek to mitigate the potential negative impact or, in certain cases benefit from the contango or backwardation that may be present in the various futures contract markets. There can be no guarantee that the Adviser will be successful in doing so.

ETF Risks.

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions. Any such decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying value of the Fund's portfolio securities and the Fund's market price. This reduced

effectiveness could result in Fund shares trading at a premium or discount to its NAV with possible greater than normal intraday bid-ask spreads.

- *Cash Redemption Risk.* The Fund's investment strategy is expected to require it to redeem its shares for cash or to otherwise include primarily cash as part of its redemption proceeds. As a result, the Fund may be required to sell or unwind portfolio investments to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to incur brokerage costs and/or recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used. By paying out higher annual capital gain distributions, investors may be subjected to increased capital gains taxes. Brokerage costs could be imposed on the Fund, and thus decrease the Fund's net asset value, to the extent that the costs are not offset by a transaction fee payable by an AP.
- *Costs of Buying or Selling Shares.* Buying or selling Shares involves certain costs, including brokerage commissions, other charges imposed by brokers, and bid-ask spreads. The bid-ask spread represents the difference between the price at which an investor is willing to buy Shares and the price at which an investor is willing to sell Shares. The spread varies over time based on the Shares' trading volume and market liquidity. The spread is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Due to the costs of buying or selling Shares, frequent trading of Shares may reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of the Shares or during periods of market volatility. This risk is heightened in times of market volatility or periods of steep market declines. The market price of Shares during the trading day, like the price of any exchange-traded security, includes a bid-ask spread charged by the exchange specialist, market makers, or other participants that trade the Shares. In times of severe market disruption, the bid-ask spread can increase significantly. At those times, Shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares.
- *Trading.* Although Shares are listed for trading on the Exchange and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange circuit breaker rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13%, and 20%). Additional rules applicable to the Exchange may halt trading in Shares when extraordinary volatility causes sudden, significant swings in the market price of Shares. There can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's portfolio holdings, which can be significantly less liquid than Shares.

Economic and Market Risk. Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in the general financial markets, a particular financial market, or other asset classes, due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, financial system instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. The imposition by the U.S. of tariffs on goods imported from foreign countries and reciprocal tariffs levied on U.S. goods by those countries also may lead to volatility and instability in domestic and foreign markets.

Gold Investment Risks. The Fund will not invest directly in gold but will gain exposure through gold futures contracts and Underlying Funds. These investments are subject to significant risk due to the inherent volatility and unpredictability of the commodities markets. The value of these investments is typically derived from the price movements of physical gold or related economic variables. Price fluctuations in gold linked instruments can be swift and substantial, often showing a low correlation with the returns of traditional equity and bond markets and may not align with trends in other asset classes.

Numerous factors can influence the price of gold and gold futures contracts, including overall market movements, interest rate changes, and variations in global supply and demand. Additionally, the volume of gold imports and exports, production factors such as weather

conditions, and technological advances in gold processing and mining can significantly impact gold and gold futures prices. Increased hedging activities, economic conditions, regulatory developments, and political stability also play crucial roles. Furthermore, global supply and demand dynamics, political and economic events, inflation expectations, currency exchange rates, and investment activities of hedge funds and commodity funds can all affect gold prices. Sharp fluctuations in gold markets may result in potential losses. In addition, Gold markets have experienced extended periods of flat or declining prices. Investors should also be aware that while gold is often used to preserve wealth, there is no assurance that it will maintain its long-term value in terms of purchasing power.

High Portfolio Turnover Risk. A high portfolio turnover rate increases transaction costs, which may increase the Fund's expenses and reduce performance. Frequent trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains.

Leverage Risk. Leverage is investment exposure that exceeds the initial amount invested. Leveraging investments, (e.g., by purchasing securities with borrowed money), is a speculative technique that increases investment risk while increasing investment opportunity. **If the Fund uses leverage through purchasing derivative instruments, the Fund has the risk that losses may exceed the net assets of the Fund.** Leverage will magnify changes in the Fund's net asset value and on the Fund's investments. Derivatives and other transactions that give rise to leverage may cause the Fund's performance to be more volatile than if the Fund had not been leveraged. Leveraging also may require that the Fund liquidate portfolio securities when it may not be advantageous to do so to satisfy its obligations or to meet segregation requirements. Further, the use of leverage may require the Fund to maintain assets as "cover," maintain segregated asset accounts, or make margin payments, which might impair the Fund's ability to sell a portfolio security or make an investment at a time when it would otherwise be favorable to do so, or require that the Fund sell a portfolio security at a disadvantageous time. Certain derivatives provide the potential for investment gain or loss that may be several times greater than the change in the value of an underlying security, asset, interest rate, index or currency, resulting in the potential for a loss that may be substantially greater than the amount invested. Some leveraged instruments have the potential for unlimited loss, regardless of the size of the initial investment. Use of leverage by the Fund may increase the Fund's assets under management thereby creating a potential conflict of interest for the Adviser and Sub-Adviser, which receive a management fee based on the Fund's assets under management. Assets raised through leverage will be subject to interest and other costs, and these costs could exceed the income earned by the Fund on the proceeds of such leverage. There can be no assurance that the Fund's income from the proceeds of leverage will exceed these costs.

Management Risk. The Fund is actively managed and may not meet its investment objective based on the Adviser or Sub-Adviser's success or failure to implement investment strategies for the Fund. The Fund's investment approach heavily relies on the use of leverage to manage overall investment risk. However, this strategy inherently carries the risk of magnifying the Fund's exposures, potentially undermining its foundational investment thesis. If the Adviser or Sub-Adviser fails to effectively control the leveraging risk, the Fund's primary investment objective may become unachievable. Therefore, the success of the Fund is closely tied to the Adviser and Sub-Adviser's ability to adeptly manage the risks associated with leveraged instruments.

Money Market Instrument Risk. The Fund may use a variety of money market instruments for cash management purposes, including money market funds, depository accounts and repurchase agreements. Repurchase agreements are contracts in which a seller of securities agrees to buy the securities back at a specified time and price. Repurchase agreements may be subject to market and credit risk related to the collateral securing the repurchase agreement. Money market instruments, including money market funds, may lose money through fees or other means.

Newer Fund Risk. The Fund is a recently organized management investment company with no operating history. As a result, prospective investors do not have a track record or history on which to base their investment decisions.

Newer Sub-Adviser Risk. The Sub-Adviser is a recently formed entity and has limited experience with managing an ETF, which may limit the Sub-Adviser's effectiveness. As a result, there is no long-term track record against which an investor may judge the Sub-Adviser and it is possible the Sub-Adviser may not achieve the Fund's intended investment objective. In addition, poor choices in security selection could increase execution costs, diminishing the Fund's overall returns. Additionally, if the Sub-Adviser relies on incorrect risk management assumptions, the Fund may suffer losses. This risk is heightened by potential failures in recognizing sectoral downturns or in achieving proper asset allocations, leading to overexposure in certain markets or sectors. These management missteps could negatively impact the Fund's performance.

Non-Diversification Risk. Because the Fund is non-diversified, it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a single issuer or a smaller number of issuers could cause the Fund's overall value to decline to a greater degree than if the Fund held a more diversified portfolio.

Operational Risk. The Fund is subject to risks arising from various operational factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund relies on third-parties for a range of services, including custody. Any delay or failure relating to engaging or maintaining such service providers may affect the Fund's ability to meet its investment objective.

Although the Fund, Adviser, and Sub-Adviser seek to reduce these operational risks through controls and procedures, there is no way to completely protect against such risks.

Reverse Repurchase Agreement Risk. Similar to borrowing, reverse repurchase agreements provide the Fund with cash for investment purposes, which creates leverage and subjects the Fund to the risks of leverage. Reverse repurchase agreements also involve the risk that the other party may fail to return the securities in a timely manner or at all. The Fund could lose money if it is unable to recover the securities and/or if the value of collateral held by the Fund, including the value of the investments made with cash collateral, is less than the value of securities.

Tax Risk. The Fund intends to treat any income received by the Subsidiary from futures contracts or from Underlying Funds as “qualifying income” under the provisions of the Code applicable to RICs. The IRS has issued numerous private letter rulings (“PLRs”) provided to third parties not associated with the Fund or its affiliates (which only those parties may rely on as precedent) concluding that similar arrangements resulted in qualifying income. Many of such PLRs have now been revoked by the IRS. In March of 2019, the IRS published Regulations that concluded that income from a corporation similar to the Subsidiary would be qualifying income. Although the Regulations do not require distributions from the Subsidiary, the Fund intends to cause the Subsidiary to make distributions that would allow the Fund to make timely distributions to its shareholders and to meet the requirement that the Subsidiary have a value not in excess of 25% of the Fund’s value at the closed of a quarter. The Fund generally will be required to include in its own taxable income the income of the Subsidiary for a tax year, regardless of whether the Fund receives a distribution of the Subsidiary’s income in that tax year, and this income would nevertheless be subject to the distribution requirement for qualification as a regulated investment company and would be taken into account for purposes of the 4% excise tax.

Underlying Fund Risk. The Fund’s investment strategy, involving indirect exposure to bitcoin and gold through one or more Underlying Funds, is subject to the risks associated with bitcoin as well as gold. Shareholders in the Fund bear both their proportionate share of expenses in the Fund and, indirectly, the expenses of the Underlying Funds.

Underlying Bitcoin Fund Risks: Investing in an Underlying Fund that focuses on bitcoin, either through direct holdings or indirectly via derivatives like futures contracts and swaps, carries significant risks. These risks include high market volatility, which can be influenced by technological advancements, regulatory changes, and broader economic factors. When trading derivatives, liquidity risks and counterparty risks are substantial. Managing futures contracts can be complex and may affect the performance of an Underlying Fund. The use of swap transactions is a highly specialized activity, which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. Additionally, each Underlying Fund, and consequently the Fund, is dependent on blockchain technology, which brings technological and cybersecurity risks, along with custodial challenges for securely storing digital assets. The constantly evolving regulatory and legal landscape presents continuous compliance and valuation difficulties. Risks related to market concentration and network issues in the digital asset sector further add complexity. Moreover, operational intricacies in managing digital assets and potential market volatility can lead to losses for each Underlying Fund.

Underlying Gold Fund Risks: Investing in an Underlying Fund that focuses on gold, either through direct holdings or indirectly via derivatives like futures contracts, carries significant risk due to the inherent volatility and unpredictability of the commodities markets. Underlying Funds that trade futures contracts are subject to derivatives risk, leverage risk, counterparty risk and futures contracts risk, among other risks. In addition, Underlying Funds holding gold directly face significant custodial and safeguarding risks regarding their gold holdings. There is an inherent danger of these gold bars being lost, damaged, stolen, or becoming inaccessible due to factors such as natural disasters or terrorism.

Potentially No 1940 Act Protections. It is expected that one or more Underlying Funds will not be registered as an investment company subject to the 1940 Act. In addition, Underlying Funds that invest directly in bitcoin or gold are not subject to the 1940 Act. Accordingly, investors in such an Underlying Fund would not have the protections expressly provided by that statute, including: provisions preventing Underlying Fund insiders from managing an Underlying Fund to their benefit and to the detriment of shareholders; provisions preventing an Underlying Fund from issuing securities having inequitable or discriminatory provisions; provisions preventing management by irresponsible persons; provisions preventing the use of unsound or misleading methods of computing Underlying Fund earnings and asset value; provisions prohibiting suspension of redemptions (except under limited circumstances); provisions limiting fund leverage; provisions imposing a fiduciary duty on fund managers with respect to receipt of compensation for services; and provisions preventing changes in an Underlying Fund’s character without the consent of shareholders. Although the Fund invests in one or more Underlying Funds only indirectly, the Fund’s investments are expected to be subject to loss as a result of these risks.

U.S. Government and U.S. Agency Obligations Risk. The Fund may invest in securities issued by the U.S. government or its agencies or instrumentalities. U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities, such as the U.S. Treasury. Payment of principal and interest on U.S. Government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S.

Government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so.

PORTFOLIO HOLDINGS INFORMATION

Information about the Fund's daily portfolio holdings is available on the Fund's website at www.quantifyfunds.com. A complete description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information (the "SAI").

MANAGEMENT

Investment Adviser

Tidal Investments LLC, a Tidal Financial Group company, located at 234 West Florida Street, Suite 203, Milwaukee, Wisconsin 53204, is an SEC-registered investment adviser and a Delaware limited liability company. Tidal was founded in March 2012 and Tidal is dedicated to understanding, researching and managing assets within the expanding ETF universe. As of June 30, 2025, Tidal had assets under management of approximately \$37.6 billion and served as the investment adviser or sub-adviser for 255 registered funds.

Tidal serves as investment adviser to the Fund and has overall responsibility for the general management and administration of the Fund pursuant to an investment advisory agreement with the Trust, on behalf of the Fund (the "Advisory Agreement"). The Adviser provides oversight of the Sub-Adviser and review of its performance. The Adviser is also responsible for trading portfolio securities and financial instruments for the Fund, including selecting broker-dealers to execute purchase and sale transactions. The Adviser also arranges for sub-advisory, transfer agency, custody, fund administration, and all other related services necessary for the Fund to operate.

For the services it provides to the Fund, the Fund pays the Adviser a unitary management fee, which is calculated daily and paid monthly, at an annual rate of 0.99% of the Fund's average daily net assets.

Under the Advisory Agreement, in exchange for a single unitary management fee from the Fund, the Adviser has agreed to pay all expenses incurred by the Fund except for its advisory fee, interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act (collectively, the "Excluded Expenses").

The Adviser also serves as the investment adviser to the Subsidiary, a wholly-owned and controlled subsidiary of the Fund, organized under the laws of the Cayman Islands as an exempted company, pursuant to an investment advisory agreement with the Subsidiary (the "Subsidiary Advisory Agreement"). The Adviser is also responsible for trading portfolio securities and financial instruments for the Subsidiary, including selecting broker-dealers to execute purchase and sale transactions. The Adviser does not receive additional compensation for its services to the Subsidiary. The investment advisory agreement between the Adviser and the Subsidiary was approved by the Board. However, because the Subsidiary is not registered under the 1940 Act, it is not subject to the regulatory protections of the 1940 Act and the Fund, as an investor in the Subsidiary, will not have all of the protections offered to investors in registered investment companies. Because the Fund wholly owns and controls the Subsidiary, and the Adviser is subject to the oversight of the Board, it is unlikely that the Subsidiary will take action contrary to the interests of the Fund or its shareholders. Additionally, as part of the Board's consideration of the Advisory Agreement between the Trust and the Adviser, the Board will also consider the Adviser's performance with regard to the Subsidiary.

Investment Sub-Adviser

Quantify Chaos Advisors, LLC, doing business as Quantify Funds ("Quantify Funds" or the "Sub-Adviser"), a Delaware corporation located at 60 Wharf Drive, Apt. 3309, Brooklyn, New York 11222, serves as the investment sub-adviser for the Fund. Quantify Chaos Advisors, LLC was founded in July 2023 (dba Quantify Funds as of August 2023), and became registered as an investment advisor registered with the SEC in November 2023. As of June 30, 2025, Quantify Funds had \$80.6 million assets under management.

The Sub-Adviser is responsible for the day-to-day management of the portion of Fund's portfolio invested in U.S. Treasury bills, money market funds, cash and other cash equivalents, subject to the supervision of the Adviser and the Board. The Sub-Adviser serves as the sub-adviser to the Fund, pursuant to a sub-advisory agreement between the Adviser and Quantify Funds (the "Sub-Advisory Agreement").

For its services as sub-adviser, Quantify Funds is entitled to receive a fee from the Adviser, which fee is calculated daily and payable monthly, at an annual rate of 0.04% of the average daily net assets of the Fund. However, as Fund Sponsor, Quantify Funds may automatically waive all or a portion of its sub-advisory fee. See "Fund Sponsor" below for more information.

The Sub-Adviser also serves as the investment sub-adviser to the Subsidiary pursuant to an investment sub-advisory agreement with the Adviser (the "Subsidiary Sub-Advisory Agreement"). The Sub-Adviser is also responsible for the day-to-day management of the portion of Subsidiary's portfolio invested in U.S. Treasury bills, money market funds, cash and other cash equivalents. The Sub-Adviser does

not receive additional compensation for its services to the Subsidiary. The Subsidiary Sub-Advisory Agreement was approved by the Board.

Advisory and Sub-Advisory Agreements

A discussion regarding the basis for the Board's approval of the Fund's Advisory Agreement and Sub-Advisory Agreement is available in the Fund's semi-annual Form N-CSR for the period ending September 30, 2024.

CFTC Regulation

Because of the nature of its investments, the Fund is subject to regulation under the Commodities Exchange Act of 1936, as amended (the "CEA"), as a commodity pool and the Adviser is subject to regulation under the CEA as a commodity pool operator ("CPO") with respect to the Fund, as those terms are defined under the CEA. The Adviser is regulated by the CFTC and the National Futures Association and is subject to those regulator's disclosure requirements. Further, the Adviser is regulated by the SEC and is subject to its disclosure requirements. The CFTC has adopted rules that are intended to harmonize certain CEA disclosure requirements with SEC disclosure requirements, including Rule 4.12(c)(3)(i) under the CEA, which requires the CPO of a registered investment company with less than three years of operating history to disclose the performance of all accounts and pools that are managed by the CPO and that have investment objectives, policies and strategies substantially similar to those of the newly-formed registered investment company. The CPO has not managed accounts and/or pools that have investment objectives, policies, and strategies substantially similar to those of the Fund. The Sub-Adviser does not trade commodity interests on behalf of the Fund or the Subsidiary and is therefore not subject to CEA regulations.

Portfolio Managers

The following individuals (each, a Portfolio Manager) have served as portfolio managers of the Fund and its Subsidiary since its inception in 2024. Mr. Dziekanski is primarily responsible for management of the portion of Fund and Subsidiary's portfolio invested in U.S. Treasury bills, money market funds, cash and other cash equivalents. Mr. Venuto and Mr. Mullen are primarily responsible for trading and execution for the Fund and Subsidiary's futures contracts.

David Dziekanski, Portfolio Manager for the Sub-Adviser

David Dziekanski is an ETF industry veteran with 20 years of asset management experience. David is the Co-Founder, Chief Executive, and Chief Investment Officer of Quantify Funds, and the Chief Executive Officer and Chief Investment Officer of Quantify Chaos. David is also a portfolio manager with Tidal Financial Group. David has 15 years of experience investing in private equity, venture capital and private real estate. David is a co-founder of Foursight Capital Partners, investing primarily in seed rounds, whose last fund focused on women-led businesses in the health & wealth sectors. Previously, David served as Vice President and Portfolio Strategist at Ladenburg Thalmann Asset management overseeing 1.8 billion in assets. His professional background includes positions in wealth management, fixed income and securities trading at Morgan Stanley, Bear Stearns & AIM securities. David holds a master's degree in quantitative finance (MSFQ) from The Washington University in St Louis' Olin School of Business, and bachelor's degrees in applied mathematics, finance, and economics from Washington University College of Arts and Sciences.

Michael Venuto, Portfolio Manager for the Adviser

Mr. Venuto is a co-founder and has been the Chief Investment Officer of the Adviser since 2012. Mr. Venuto is an ETF industry veteran with over a decade of experience in the design and implementation of ETF-based investment strategies. Previously, he was Head of Investments at Global X Funds where he provided portfolio optimization services to institutional clients. Before that, he was Senior Vice President at Horizon Kinetics where his responsibilities included new business development, investment strategy and client and strategic initiatives. Mr. Venuto studied Philosophy and Religion at North Carolina State University.

Christopher P. Mullen, Portfolio Manager for the Adviser

Christopher P. Mullen serves as Portfolio Manager at the Adviser, having joined the firm in January 2024. From September 2019 to December 2023, he was a Portfolio Manager at Vest Financial LLC, where he managed exchange-traded funds, mutual funds and retirement fund portfolios. Mr. Mullen previously served as a Senior Portfolio Analyst at ProShares Advisors LLC from September 2016 until September 2019. Prior to that, Mr. Mullen served as associate portfolio manager at USCF Investments LLC from February 2013 to September 2016. Mr. Mullen received a Master of Business Administration from the University of Maryland. He also holds a dual bachelor's degree in global politics and history from Marquette University.

The Fund's SAI provides additional information about each Portfolio Manager's compensation structure, other accounts that each Portfolio Manager manages, and each Portfolio Manager's ownership of Shares.

FUND SPONSOR

The Adviser has entered into a fund sponsorship agreement with Quantify Funds (Sponsor) pursuant to which Sponsor is a sponsor to the Fund. Under this arrangement, Sponsor has agreed to provide financial support (as described below) to the Fund. In turn, the Adviser has agreed to share with Sponsor a portion of profits, if any, generated by the Fund's Advisory Fee. Every month, the Advisory Fees, which are unitary management fees, for the Fund are calculated and paid to the Adviser.

If the amount of the unitary management fee for the Fund exceeds the Fund's operating expenses (including the sub-advisory fee) and the Adviser-retained amount, the Adviser pays the net total to Sponsor. The amounts paid to Sponsor represent any remaining profits from the Advisory Fee.

During months when the funds generated by the unitary management fee are insufficient to cover the entire sub-advisory fee, that fee is automatically waived (and any such waiver is not subject to recoupment).

Further, if the amount of the unitary management fee for the Fund is less than the Fund's operating expenses and the Adviser-retained amount, Quantify Funds is obligated to reimburse the Adviser for the shortfall.

HOW TO BUY AND SELL SHARES

The Fund issues and redeems Shares only in Creation Units at the NAV per share next determined after receipt of an order from an AP. Only APs may acquire Shares directly from the Fund, and only APs may tender their Shares for redemption directly to the Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by the Distributor (defined below), and that has been accepted by the Fund's transfer agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

Most investors buy and sell Shares in secondary market transactions through brokers. Individual Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares, and receive less than NAV when you sell those Shares.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC's participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book-entry or street name through your brokerage account.

Frequent Purchases and Redemptions of Shares

The Fund imposes no restrictions on the frequency of purchases and redemptions of Shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with the Fund, are an essential part of the ETF process and help keep Share trading prices in line with the NAV. As such, the Fund accommodates frequent purchases and redemptions by APs. However, the Board has also determined that frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization of capital gains. To minimize these potential consequences of frequent purchases and redemptions, the Fund employs fair value pricing and may impose transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting trades. In addition, the Fund and the Adviser reserve the right to reject any purchase order at any time.

Determination of Net Asset Value

The Fund's NAV is calculated as of the scheduled close of regular trading on the New York Stock Exchange ("NYSE"), generally 4:00 p.m. Eastern Time, each day the NYSE is open for business. The NAV for the Fund is calculated by dividing the Fund's net assets by its Shares outstanding.

In calculating its NAV, the Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. If such information is not available for a security or other asset held by the Fund or is determined to be unreliable, the security or other asset will be valued at fair value estimates under guidelines established by the Adviser (as described below).

Fair Value Pricing

The Board has designated the Adviser as the “valuation designee” for the Fund under Rule 2a-5 of the 1940 Act, subject to its oversight. The Adviser has adopted procedures and methodologies, which have been approved by the Board, to fair value Fund investments whose market prices are not “readily available” or are deemed to be unreliable. For example, such circumstances may arise when: (i) an investment has been delisted or has had its trading halted or suspended; (ii) an investment’s primary pricing source is unable or unwilling to provide a price; (iii) an investment’s primary trading market is closed during regular market hours; or (iv) an investment’s value is materially affected by events occurring after the close of the investment’s primary trading market. Generally, when fair valuing an investment, the Adviser will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer’s business, recent trades or offers of the investment, general and/or specific market conditions, and the specific facts giving rise to the need to fair value the investment. Fair value determinations are made in good faith and in accordance with the fair value methodologies included in the Adviser adopted valuation procedures. The Adviser will fair value Fund investments whose market prices are not “readily available” or are deemed to be unreliable. Due to the subjective and variable nature of fair value pricing, there can be no assurance that the Adviser will be able to obtain the fair value assigned to the investment upon the sale of such investment.

Investments by Other Registered Investment Companies in the Fund

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies, including Shares. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1), subject to certain terms and conditions of rules under the 1940 Act, including that such investment companies enter into an agreement with the Fund.

Delivery of Shareholder Documents Householding

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

Dividends and Distributions

The Fund intends to pay out dividends and interest income, if any, annually, and distribute any net realized capital gains to its shareholders at least annually. The Fund will declare and pay income and capital gain distributions, if any, in cash. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Taxes

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Fund. Your investment in the Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Shares, including the possible application of foreign, state, and local tax laws.

The Fund intends to qualify each year for treatment as a regulated investment company (a “RIC”) under the Code. If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund-level on income and gains from investments that are timely distributed to shareholders. However, the Fund’s failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless your investment in Shares is made through a tax-exempt entity or tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when the Fund makes distributions, when you sell your Shares listed on the Exchange, and when you purchase or redeem Creation Units (institutional investors only).

The following general discussion of certain U.S. federal income tax consequences is based on provisions of the Code and the regulations issued thereunder as in effect on the date of this Prospectus. New legislation, as well as administrative changes or court decisions, may

significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Taxes on Distributions

For federal income tax purposes, distributions of net investment income are generally taxable to shareholders as ordinary income or qualified dividend income. Taxes on distributions of net capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned their Shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund's net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by the Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gains to shareholders. Distributions of short-term capital gain will generally be taxable to shareholders as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional Shares.

Distributions reported by the Fund as "qualified dividend income" are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided certain holding period and other requirements are met. "Qualified dividend income" generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. Because of the investment strategy of the Fund, it is unlikely that the Fund will pay any dividends which constitute "qualified dividend income" or which qualify for the corporate dividends-received deduction.

Shortly after the close of each calendar year, you will be informed of the character of any distributions received from the Fund.

In addition to the federal income tax, certain individuals, trusts, and estates may be subject to a Net Investment Income ("NII") tax of 3.8%. The NII tax is imposed on the lesser of: (i) a taxpayer's investment income, net of deductions properly allocable to such income; or (ii) the amount by which such taxpayer's modified adjusted gross income exceeds certain thresholds (\$250,000 for married individuals filing jointly, \$200,000 for unmarried individuals and \$125,000 for married individuals filing separately). The Fund's distributions are includable in a shareholder's investment income for purposes of this NII tax. In addition, any capital gain realized by a shareholder upon a sale or redemption of Fund shares is includable in such shareholder's investment income for purposes of this NII tax.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable to you even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the Shares' NAV when you purchased your Shares).

You may wish to avoid investing in the Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable to you even though it may economically represent a return of a portion of your investment.

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by the Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met.

Under the Foreign Account Tax Compliance Act ("FATCA"), the Fund may be required to withhold a generally nonrefundable 30% tax on distributions of net investment income paid to (A) certain foreign financial institutions unless such foreign financial institution agrees to verify, monitor, and report to IRS the identity of certain of its account-holders, among other items (or unless such entity is otherwise deemed compliant under the terms of an intergovernmental agreement between the United States and the foreign financial institution's country of residence), and (B) certain non-financial foreign entities unless such entity certifies to the Fund that it does not have any substantial U.S. owners or provides the name, address, and taxpayer identification number of each substantial U.S. owner, among other items. This FATCA withholding tax could also affect the Fund's return on its investments in foreign securities or affect a shareholder's return if the shareholder holds its Fund shares through a foreign intermediary. You are urged to consult your tax adviser regarding the application of this FATCA withholding tax to your investment in the Fund and the potential certification, compliance, due diligence, reporting, and withholding obligations to which you may become subject in order to avoid this withholding tax.

The Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that they are not subject to such withholding.

Taxes When Shares are Sold on the Exchange

Any capital gain or loss realized upon a sale of Shares generally is treated as a long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends paid with respect to such Shares. Any loss realized on a sale will be disallowed to the extent Shares are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the sale of substantially identical Shares.

Taxes on Purchases and Redemptions of Creation Units

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP's aggregate basis in the securities delivered plus the amount of any cash paid for the Creation Units. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP's basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The IRS may assert, however, that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing "wash sales" (for an AP who does not mark-to-market their holdings) or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if Shares comprising the Creation Units have been held for more than one year and as a short-term capital gain or loss if such Shares have been held for one year or less.

The Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. The Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

Important Tax Considerations When Purchasing Fund Shares

If you are investing through a taxable account, you should carefully consider the timing of your investment relative to the Fund's distribution schedule. Purchasing Fund shares shortly before a distribution may increase your tax liability, a situation commonly referred to as "buying a dividend."

When the Fund makes a distribution, its share price typically drops by an amount roughly equal to the distribution. As a hypothetical example, if you invest \$5,000 to purchase 250 shares at \$20 per share on December 15, and the Fund pays a \$1 per share distribution on December 16, the share price would adjust to \$19 (ignoring market fluctuations). Although your total investment value remains \$5,000 (250 shares \times \$19 in share value plus 250 shares \times \$1 distribution), you would owe taxes on the \$250 distribution, even if you reinvest the distribution rather than receiving it in cash.

Distributions are taxable to shareholders even if they are paid from income or gains realized by the Fund before you invested, and even if they were reflected in the purchase price of the shares. Consequently, you may incur taxes on income or gains that accrued before your investment, without corresponding benefit.

Unless you are investing through a tax-advantaged account, such as an IRA or an employer-sponsored retirement plan, you may wish to avoid purchasing Fund shares shortly before a distribution. You can minimize the potential tax impact by reviewing the Fund's distribution schedule prior to investing. When available, information about the Fund's distribution schedule can be found on the Fund's website at www.quantifyfunds.com.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to foreign, state, and local tax on Fund distributions and sales of Shares. Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. For more information, please see the section entitled "Federal Income Taxes" in the SAI.

DISTRIBUTION

Foreside Fund Services, LLC, a wholly owned subsidiary of Foreside Financial Group (dba ACA Group) (the "Distributor"), the Fund's distributor, is a broker-dealer registered with the SEC. The Distributor distributes Creation Units for the Fund on an agency basis and does not maintain a secondary market in Shares. The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund. The Distributor's principal address is 190 Middle Street, Suite 301, Portland, Maine 04101.

The Board has adopted a Distribution (Rule 12b-1) Plan (the “Plan”) pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year to pay distribution fees for the sale and distribution of its Shares.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of Fund assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

PREMIUM/DISCOUNT INFORMATION

Information regarding how often Shares traded on the Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund can be found on the Fund’s website at www.quantifyfunds.com.

ADDITIONAL NOTICES

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in the determination of, the timing, prices, or quantities of Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to the owners of Shares in connection with the administration, marketing, or trading of Shares.

Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser, the Sub-Adviser, and the Fund make no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly.

The Third Amended and Restated Declaration of Trust (“Declaration of Trust”) provides a detailed process for the bringing of derivative or direct actions by shareholders in order to permit legitimate inquiries and claims while avoiding the time, expense, distraction, and other harm that can be caused to the Fund or its shareholders as a result of spurious shareholder demands and derivative actions. Prior to bringing a derivative action, a demand by three unrelated shareholders must first be made on the Fund’s Trustees. The Declaration of Trust details various information, certifications, undertakings and acknowledgments that must be included in the demand. Following receipt of the demand, the trustees have a period of 90 days, which may be extended by an additional 60 days, to consider the demand. If a majority of the Trustees who are considered independent for the purposes of considering the demand determine that maintaining the suit would not be in the best interests of the Fund, the Trustees are required to reject the demand and the complaining shareholders may not proceed with the derivative action unless the shareholders are able to sustain the burden of proof to a court that the decision of the Trustees not to pursue the requested action was not a good faith exercise of their business judgment on behalf of the Fund. The Declaration of Trust further provides that shareholders owning Shares representing no less than a majority of the Fund’s outstanding shares must join in bringing the derivative action. If a demand is rejected, the complaining shareholders will be responsible for the costs and expenses (including attorneys’ fees) incurred by the Fund in connection with the consideration of the demand, if a court determines that the demand was made without reasonable cause or for an improper purpose. If a derivative action is brought in violation of the Declaration of Trust, the shareholders bringing the action may be responsible for the Fund’s costs, including attorneys’ fees, if a court determines that the action was brought without reasonable cause or for an improper purpose. The Declaration of Trust provides that no shareholder may bring a direct action claiming injury as a shareholder of the Trust, or any Fund, where the matters alleged (if true) would give rise to a claim by the Trust or by the Trust on behalf of the Fund, unless the shareholder has suffered an injury distinct from that suffered by the shareholders of the Trust, or the Fund, generally. Under the Declaration of Trust, a shareholder bringing a direct claim must be a shareholder of the Fund with respect to which the direct action is brought at the time of the injury complained of or have acquired the shares afterwards by operation of law from a person who was a shareholder at that time. The Declaration of Trust further provides that the Fund shall be responsible for payment of attorneys’ fees and legal expenses incurred by a complaining shareholder only if required by law, and any attorneys’ fees that the Fund is obligated to pay shall be calculated using reasonable hourly rates. These provisions do not apply to claims brought under the federal securities laws.

The Declaration of Trust also requires that actions by shareholders against the Fund be brought exclusively in a federal or state court located within the State of Delaware. This provision will not apply to claims brought under the federal securities laws. Limiting shareholders’ ability to bring actions only in courts located in Delaware may cause shareholders economic hardship to litigate the action in those courts, including paying for travel expenses of witnesses and counsel, requiring retaining local counsel, and may limit shareholders’ ability to bring a claim in a judicial forum that shareholders find favorable for disputes, which may discourage such actions.

The Sub-Adviser has entered into a brand licensing agreement with Newfound Research LLC (“Newfound”) and ReSolve Asset Management SEZC (Cayman) (“ReSolve”), granting the Sub-Adviser the right to use the “STKD” brand, a derivative of Return Stacked®. Neither the Trust nor the Adviser is a party to this agreement. In exchange for the branding rights, the Sub-Adviser pays Newfound and ReSolve a fee based on a percentage of the Fund’s unitary management fee.

FINANCIAL HIGHLIGHTS

The Financial Highlights table is intended to help you understand the Fund's performance for its fiscal periods of operations. Certain information reflects financial results for a single Fund share. The total return in the table represents the rate that an investor would have earned or lost on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Cohen & Company, Ltd., the Fund's independent registered public accounting firm, whose report, along with the Fund's financial statements, is included in the Fund's annual Certified Shareholder Annual Report on Form N-CSR, which is available upon request.

STKd 100% Bitcoin & 100% Gold ETF

For a share outstanding throughout the period presented

	Period ended March 31, 2025^(a)
PER SHARE DATA:	
Net asset value, beginning of period	\$ 20.00
INVESTMENT OPERATIONS:	
Net investment income ^{(b)(c)}	0.32
Net realized and unrealized gain (loss) on investments ^(d)	6.49
Total from investment operations	6.81
LESS DISTRIBUTIONS FROM:	
Net investment income	(0.05)
Total distributions	(0.05)
Net asset value, end of period	\$ 26.76
TOTAL RETURN^(e)	34.06%
SUPPLEMENTAL DATA AND RATIOS:	
Net assets, end of period (in thousands)	\$ 24,085
Ratio of expenses to average net assets ^{(f)(g)}	0.99%
Ratio of interest expense on futures contracts to average net assets ^{(f)(g)}	0.00% ^(h)
Ratio of net investment income (loss) to average net assets ^{(c)(f)}	2.51%
Portfolio turnover rate ^{(e)(i)}	107%

(a) Inception date of the Fund was October 15, 2024.

(b) Net investment income per share has been calculated based on average shares outstanding during the period.

(c) Recognition of net investment income by the Fund is affected by the timing of the declaration of dividends by the underlying exchange traded funds in which the Fund invests. The ratio does not include net investment income of the exchange traded funds in which the Fund invests.

(d) Realized and unrealized gains and losses per share in the caption are balancing amounts necessary to reconcile the change in net asset value per share for the period and may not reconcile with the aggregate gains and losses in the Consolidated Statement of Operations due to share transactions for the period.

(e) Not annualized for periods less than one year.

(f) Annualized for periods less than one year.

(g) These ratios exclude the impact of expenses of the underlying exchange traded funds as represented in the Consolidated Schedule of Investments.

(h) Amount represents less than 0.005%.

(i) Portfolio turnover rate excludes in-kind transactions.
